

I. Introduction :

The term ‘Smart Farmer’ means a platform that is dedicated to integrate farmer, Merchant/Markets, government and end user and thereby bridge the gap between them. It also let everyone to be updated with the changing market scenario. Bangladeshi farmers faced many challenges and one of them is that to get a good profit for the efforts and investment that they had put in. There exist different reasons like season limitation, crop life due to which farmer get very limited amount of time to study the market conditions. farmer has a limited amount of time to find out nearest market, current stock details. Smart Farmer App can solve these daily problems of farmers. Farmers will be able to get their required fertilizer to crop seedlings and seeds through this app. And they can sell their crops at the right price. And making the right profit. One of the problems faced by farmers is determining the amount of fertilizer applied to the land. As a solution to this problem, the pesticide calculator has been kept as a small part of the app. Through which the farmer will be able to determine the amount of fertilizer according to the amount of his land.

There are many mix e commerce apps in our country. Through which we can buy our daily necessities online. This ‘Smart Farmer’ app will be able to bring this modern trend to the farmers as well.

II. Objective of the ‘Smart Farmer’ app:

1. Farmers can easily purchase fertilizers and pesticides for their crops at the right price.
2. Farmers will know about the current market place.
3. Farmers can easily purchase medicine for their animals and birds at the right price.
4. With the help of pesticide calculator, they can determine the amount of fertilizer according to their land.
5. They can buy the seedlings or seeds they need for cultivation at the right price.
6. And they can also buy agricultural machinery through this ‘Smart Farmer’ app.

III. Activity Diagram :

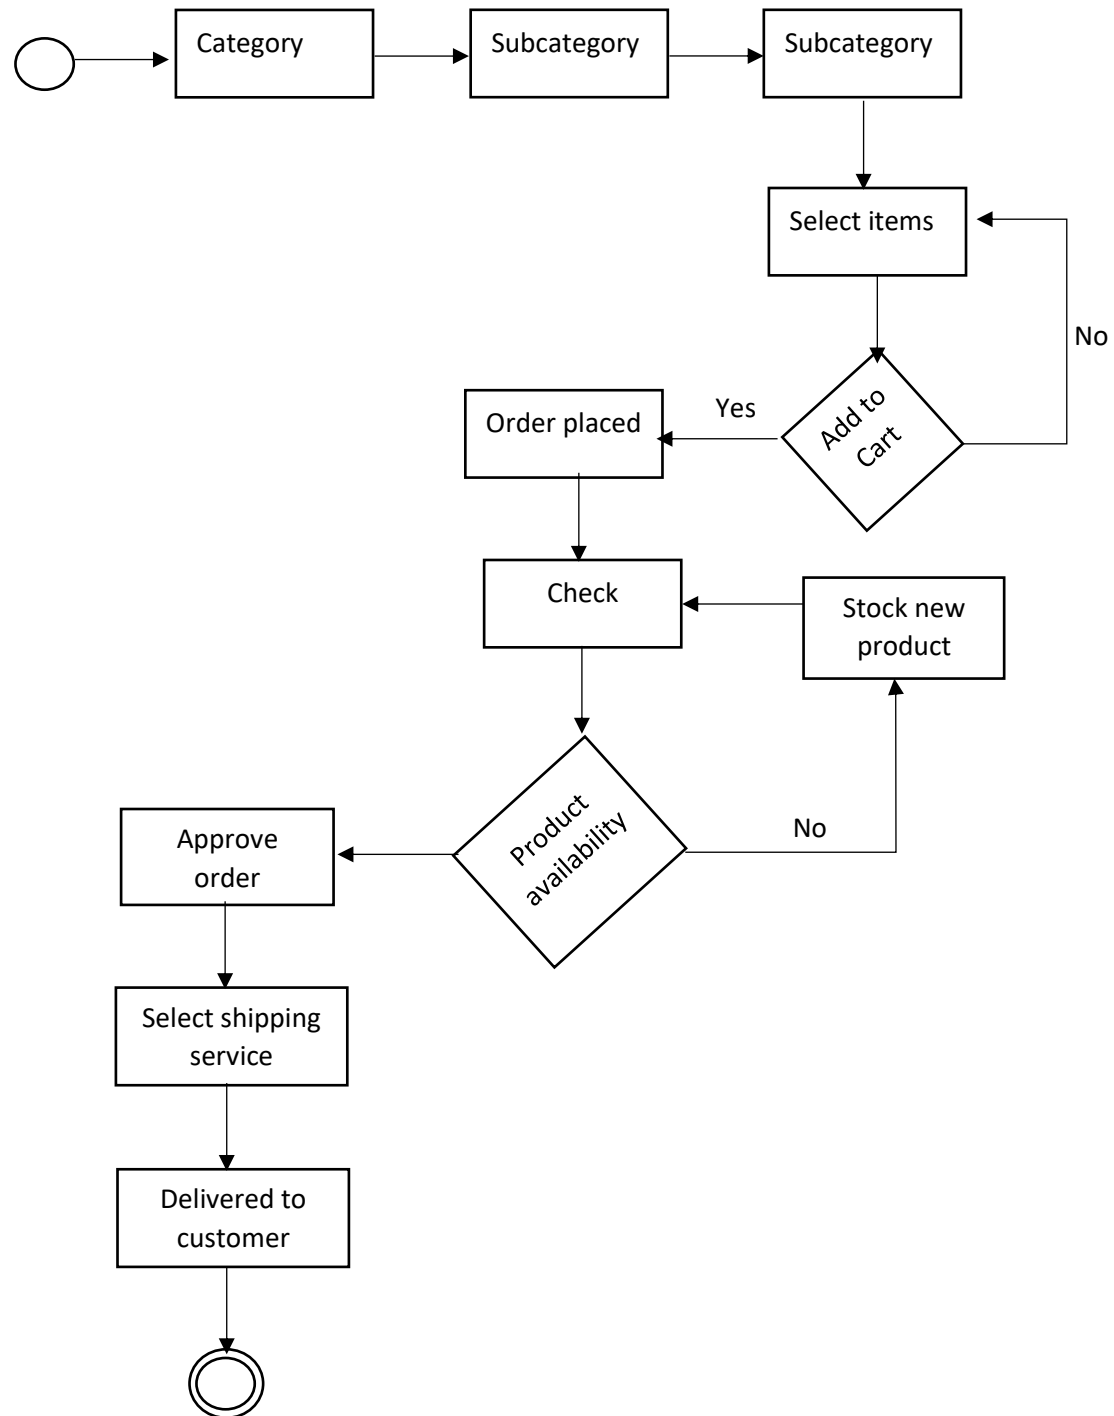

Fig:1.1 activity diagram

To order a product, first select the category. Then we have to select the desired product by selecting the sub category and add it to the cart. If you want to order the product, you have to complete the order process. Once the order process is complete, if there is sufficient quantity on the seller's site, the order will be approved and the shipping method will be selected and delivered to the customer.

IV. Features of 'Smart Farmer' app :

- 1. Splash Screen :** When we open the Smart Farmer app, we will see a splash screen of 2 seconds. Where our app name and logo appear.

Fig:1.2 Splash screen

- 2. Log in and Sign up screen :** At the end of the 2-second splash screen, the login and sign-up screen will appear in front of us. To access the app we must have an account with which account to log in. When logged in, the home page will appear in front of us. If there is no account, the user can sign up with the help of email and password.

VII. Target Population :

This app is mainly made targeting farmers. Although there are many favorite e-commerce apps in our country. There is no such platform for farmers. For which ‘Smart Farmer’ app is made for farmers.

VIII. Social Benefit :

Through this app, farmers can buy fertilizers at the right price. As a result production difficulties will be reduced. Moreover, farmers can sell their crops at the right price. As a result, farmers will benefit. The product goes through many stages for sale and finally the product reaches the consumer. Selling products online will not require these steps. So the ,Product prices will be under control.

IX. Conclusion :

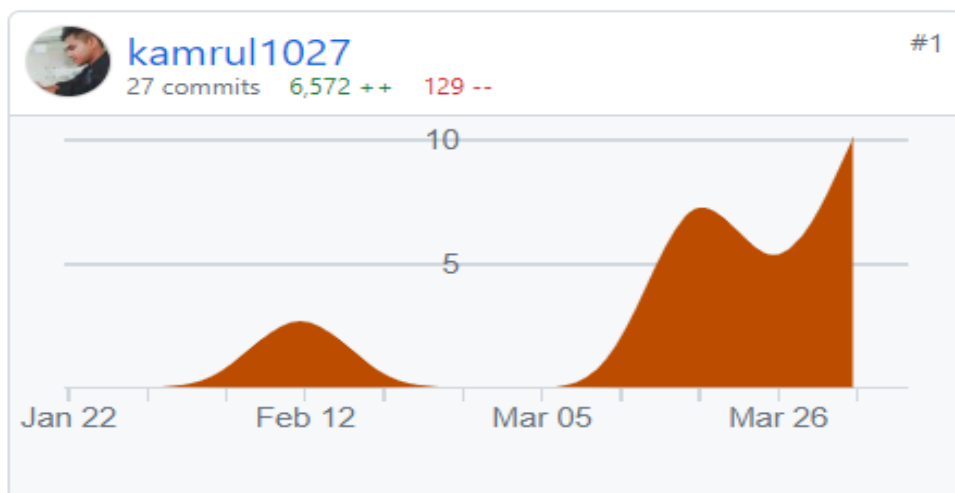

With the help of this system, farmer can optimize his crop profit and launch complaint. Government can set minimum price for minimum quality of crop/product. Government can set and update rules and regulations time to time for better and effective management. Government can deal with different problem with the help of market details and load balancing technique.
